Administrative Announcement

Number: AAB026 -

Date: August 2004

SUBJECT: Memory Options Expanded

Sharp Services & Support Group is pleased to announce the immediate availability of RAM memory modules for use with the FO-DC525. Like the other memory products we offer, these modules have been tested with Sharp Imagers and their compatibility is assured.

As you know Sharp Imagers are employed in a wide variety of applications. Obtaining optimal performance sometimes requires increasing the amount of memory available to the machine, and/or its controller. We have validated these items and have worked with our vendor to ensure that none of the specifications will change without notice, thus ensuring you that they are compatible. Below is a complete list of competitively priced memory options available to you via SharpNet.

<u>Part Number</u>	<u>Description</u>	<u>Model Supported</u>
IMC16X64S133/	128MB, PC133, DIMM	AR-235/275 (IMC & AR-P11), AR-P350/P450 & AR-M350/M450
SHP4X64S100C2	32MB, PC100, DIMM	AR-235/275 (IMC & AR-P11)
SHP8X64S100C2	64MB, PC100, DIMM	AR-235/275 (IMC & AR-P11), AR-P350/P450 & AR-M350/M450
SHP16X64S133C3-B	128MB, PC133, DIMM	AR-PB2x, AR-M550/M620/M700
SHP32X64S133C3-B	256MB, PC133, DIMM	AR-PB2x, AR-EB7, AR-M160/M205, AR-M550/M620/M700, AR-P350/P450 & AR-M350/M450
SHP16X64S133SC3-B	128MB, PC133 <u>SODIMM</u>	PCL (AR-P17) ARNB2/N
SHP32X64S133SC3-B	256MB, PC133 <u>SODIMM</u>	PCL (AR-P17) ARNB2/N
SHP4X326EG	16MB, 60NS, EDO, <u>SIMM</u>	AR-EB3
SHP8X326EG	32MB, 60NS, EDO, <u>SIMM</u>	AR-EB3
SHP8X64V6EG	64MB, 60NS, EDO, DIMM	AR-PB8
UG516S6648///	128 MB DIMM	AR-PE1 & AR-PE2 Controller
MXSHARPPCL128	128 MB FO-NP1 Low Profile Memory	FO-DC500/DC525/DC600
SHP64X64S133C3	512MB DIMM	AR-M550/M620/M700, ARM237/M277(IMC)
